

STOP — do not start digging. A 2.0m or exemption condition is not met.

Project details

Homeowner name	Carl Graham
Email	—
Site address	12 Test Street, Matakohē
Lot and DP number	—
Lead LBP name	Jo Builder
LBP licence number	—
PIM number	PIM-2026-123
Date of this check	1 October 2026

Finding your boundaries

1. I have found at least 3 surveyor's boundary pegs on my site.

Answer: Yes

2. I can read the lot number on each peg, and it matches my Record of Title.

Answer: Yes

3. The pegs look undisturbed — not loose, leaning, dug up or recently moved.

Answer: Yes

4. String lines have been run between the pegs so the boundary can be measured.

Answer: Not sure

What to do next: Ask your LBP to run string lines between the pegs. You need a straight line to measure from.

Photos of each peg (lot number visible) and the string lines (1)

The 2 metre rule

Minimum 2.0m to every legal boundary and any other residential building, measured to the external wall.

Front boundary	3.20 m OK
Rear boundary	2.50 m OK
Left side boundary	1.80 m — UNDER 2.0m
Right side boundary	2.00 m OK
Main house or nearest other residential building	4.00 m OK

5. The set-out on site matches the position shown on my site plan.

Answer: Yes

6. Eaves, gutters and any overhangs have been checked against the site plan so they don't project closer to the boundary than designed.

Answer: Yes

Ground, water and services

7. The building is not sitting in a hollow or low spot where surface water will collect.

Answer: Yes

8. The building is not in an overland flow path — a route that carries stormwater across the property in heavy rain.

Answer: Yes

9. If my site is lower than the road, the finished floor level will be at least 150mm above the kerb.

Answer: Not applicable

10. The ground looks firm — no soft spots, obvious fill, old septic tanks or soak holes, tree roots or topsoil where the foundations will go.

Answer: Yes

11. Underground drains and services (water, power, stormwater, wastewater) have been located and marked on the ground.

Answer: Yes

12. The finished floor level will be no more than 1.0 metre above the ground.

Answer: Yes

13. My plans show the exposure or corrosion zone for my site, such as a sea spray zone.

Answer: Yes

Street frontage

14. I have photographed the footpath, berm, kerb and driveway crossing before work starts.

Answer: Yes

Sign off

Items to resolve

- Left side boundary: 1.8m — under 2.0m
- 4. String lines have been run between the pegs so the boundary can be measured. — Not sure

Notes

Left side is 1.8m - talk to designer about moving the building.

Homeowner: Carl Graham

This record was completed by the homeowner as an educational self-check using the Granny Flat Checklist. It does not certify the building work and does not replace the responsibilities of the Licensed Building Practitioner or the owner's obligations under the Building Act 2004. Scope: Building Act and Building Code matters only; district plan matters are not covered.
